EDUCATION

London School of Economics

PhD, Economics 2020-2025

Advisors: Guy Michaels, Camille Landais

MRes, Economics (with Distinction) 2018-2020

MSc, Economics (with Distinction) 2017-2018

Diploma, Economics (with Merit) 2016-2017

University of Illinois Urbana-Champaign

B.S., Actuarial Science (with highest distinction), Economics 2008-2011

RESEARCH INTERESTS

Labour economics, economic geography, public economics

WORKING PAPERS

Local Labour Markets and Skill Acquisition 2024

Abstract: Educational attainment varies widely and persistently across England. I combine establishment-level administrative data on local labour market demand, with individual-level education choice data to document the spatial variation of skill demand, identify the role that existing differences in skill demand play in educational attainment, and derive an elasticity of the supply of skills to local skill demand. The responsiveness of education to skill demand has implications for labour market adjustments to economic shocks, the persistence of local economic outcomes, and the effectiveness of local economic policies.
